

# Welcome to the Innovation and Manufacturing Center

## Why?

Too many innovators have strong ideas but lack access to the tools, training, and connections needed to bring physical products to market.

Women and people of color are especially impacted. For decades, they have been cut off from manufacturing resources, technical expertise, capital, and industry networks. The result is talent without opportunity and ideas that never reach scale.

### IaMC was created to change that.

We believe innovation should create jobs, ownership, and long-term community stability, not just startups that leave the neighborhood behind.
